2.Fundamentals of SQL
3.Fundamentals of Javascript
4.Node JS Frame Work Fundamentals
5.React JS Frame Work(Currently Learning) Fundamentals
6.Fundamentals of HTML,CSS
7.Bootstrap FrameWork for HTML

The skills that I developed are from the NxtWave academy online where I solved many assignment projects based on the languages that I know.The below projects are built by me as an Interest.

PROJECTS

Mostly the projects that I made are frontend.

1. The Searching website: saifsearch.ccbp.tech

A dynamic search engine built with HTML,CSS and JavaScript featuring an intuitive UI for efficient real-time data retrieval.

2. Number Guessing Game: guessgame2005.ccbp.tech

A number guessing game which children can enjoy playing.Made through HTML,CSS and Javascript.

PRESENT UPDATE OF MY LEARNING

I got selected at Qspider training company to learn data analytics.They offered me a free course offline.I will be building projects based on the languages I know and will also be diving deep into the data analytics from this course.The languages I mentioned you are my core skills that I have. I will be building projects upon it.Iam also ready to take your suggestions and can change my stream based on it as I have good fundamental knowledge. It won't take me much time to learn new things.My plan is to come to SaudiArabia for my future job.

INTERNSHIPS

I did a non technical paid internship for 6 months in Li2Edu and also handled their flagship programs held by Hexart.In where we used to teach them and give them the basic knowledge of AI.Here my teaching skills and managerial skills to handle the Hexart.In centre got improved.

HOBBIES

1.playing basketball at my free time 2.Practicing Quran Recitations.
